Life is not a straight line®
In nature, there is no such thing as a right angle or a straight edge. Yet, when it comes to products, we work very hard to square off the curves, to correct the imperfections - because it’s easier, because it’s cheaper, because the products we create will fit with all the other squared off things in our lives.

Beautiful materials don’t fit in a box. The uniqueness, the personality, the love that nature gave us should show through.

Our mission is to break this cycle. Every product we produce, every project we participate in, every person we hire is a step towards this goal.

**IT WASN’T NATURE THAT CREATED STRAIGHT LINES**

It was the limitations of technology.
LIFE IS NOT A STRAIGHT LINE

We strongly believe this to be a good thing. It's what makes life exciting and fun; it's where we can express our love of nature and life; it's where we can embrace and celebrate the twists and turns, the imperfections that make us who we are. At Bole we work hard to preserve and use the curves that nature gives us, in our products, in our work, in our lives. Our name comes from the Old English word “bole”, the trunk of a tree.
Bolefloor is the world’s first manufactured, naturally curved, hardwood flooring that follows a tree’s natural growth. Our LiveEdge process manages and tracks each board from its raw lumber stage through final installation. Our technology allows us to preserve the natural curves of the wood, thus minimizing waste and giving a unique look to every floor.

A small ecological footprint and a natural look are achieved by processing every board individually with unique, software-guided, advanced woodworking machinery. Bolefloor’s optimization technology means conservation of natural resources. Not only is the surface aesthetically appealing, but Bolefloor’s innovations allow for more floors per forest.
Our floors are manufactured in limited editions and are always custom-made. Just like a fingerprint or a retina is unique to each person, so is Bolefloor for each project. Each Bolefloor is tailor-made per the customer's request and test-assembled at least twice before shipping, to ensure the highest quality and a perfect match.
PICK A STYLE, ANY STYLE

It’s not only about the curves. Picking the right wood, the right grade and even how it looks with finish creates endless variety.

Bolefloor comes in numerous wood species and various quality grades. Combining this with a myriad of finishing techniques and your ideas will make your floor even more unique.

BOLEFLOOR IS AVAILABLE IN

- Oak
- Walnut
- Cherry
- Ash
- Thermo Ash Light
- Thermo Ash Dark

QUALITY GRADING

- Select
  No sapwood or dark knots. Healthy knots and “cat paw” present.

- Natural
  Sapwood and small dark knots present, as well as healthy knots and “cat paw”.

- Rustic
  Sapwood, dark knots and filled cracks up to 2 mm (0.079”) in width can be present.
Solid flooring is the soul of Bolefloor, but some conditions require an engineered solution. Bolefloor’s engineered product can be used over hydronic floor heating systems.

**SOLID BOLEFLOOR S20**

- Overall thickness: 20 mm (0.79”)
- Length: 500-2950 mm (20”-10’)
- Width: ca. 100-350 mm (4”-14”)
- Overall weight up to: 13.8 kg/m²

**ENGINEERED BOLEFLOOR E17**

- Core layer: Baltic birch plywood
- Overall thickness: 17 mm (0.67”)
- Length: 500-2950 mm (20”-10’)
- Width: ca. 100-450 mm (4”-17.7”)
- Wear layer thickness: 5 mm (0.19”)
- Core layer thickness: 12 mm (0.47”)
- Overall weight up to: 11.8 kg/m²

**BEVELS**

Bolefloor is manufactured with 2 mm (0.079”) bevels on the long edges and 1 mm (0.04”) on the short edges for natural looks. Upon request bevels can be ordered in 0 mm, 1 mm (0.04”) and 2 mm (0.079”). Flooring ordered without bevels will be delivered as unfinished and has to be sanded at the jobsite prior to finishing.

- Boards with 2 mm (0.079”) bevels on long edges and no bevels on short edges.
- Boards with 2 mm (0.079”) bevels on long edges and 1 mm (0.04”) on short edges.

**UNFINISHED CHARACTERISTICS**

Unfinished flooring should be lightly sanded with 120 grit paper after installation for better oil or lacquer performance.

Exclusive flooring demands for exclusive finishing designed to meet the vision of the client. Factory finishing and individual color development available with oils and lacquers.

Bolefloor is strongly recommended to be installed glued down. The floor should be re-oiled once after installation for better durability. All Bolefloor products are connected using the tongue and groove method.

The technical specification of the product conforms to the requirements and contains the product compliance description pursuant to the EN 14342:2005+A1:2013 standard.

Bolefloor hereby confirms that the floorboards comply with the 89/106/EEC Directive for Construction Products.

- Thermal transmittance: 0.15-0.17 λ (W/mK)
- Fire resistance class: C - s1
- Formaldehyde emission: E1

**SPECIAL ORDERS**

For special orders production can accommodate up to 6000 mm (20’) lengths and up to 450 mm (17.7”) in width for one board. When circumstances require, engineered Bolefloor can be produced in special thicknesses of 14 mm (0.55”) and 20 mm (0.79”).

Please contact us for more technical details regarding product finishing and installation.
OAK COLORS, INSPIRED BY NATURE

Our finishing process and materials allow us to develop a wide range of colors and effects— from the subtlest of tints to the most colorful of flairs.

Inspired by the natural beauty of some of the world’s greatest rivers, never straight but always giving life to people and the environment around them, we have selected some possible variations to get the imagination going.

Flowing through the varied landscapes of Europe, Prut feeds and powers three nations. The dark hints of the wintry landscapes are a truly breathtaking sight.
As it cuts through the Sam Phan Bok rock canyons in Thailand, the mighty Khong seems to swallow the sunrise, exuding an almost golden, sandy glow.
Flowing through the crevices of the volcanic marvel that is Iceland, the Tungnaá takes on a frozen, almost silver hew.
Routinely referred to as the liquid rainbow, the Caño Cristales can produce some of the most vibrant colors. The red hue, given to it by the minerals in the riverbed, almost feels like it was not created on this planet.
This river winds through the rolling pine and spruce forests of Estonia. As quiet, subtle and natural as it gets in this beautiful part of the world.

Tranquil as it flows, the Katherine still carves her gorge as the surrounding sandstone cliffs lend the waters a hint of red from their ancient palette.
The moon seeps through the midnight clouds in the north of Iceland, its frail light easing the spellbinding darkness on the ground, where the roaring fall of the Selfoss knows no silence.
Through the rugged and rich terrain of Serbia, the Uvac meanders, imbued with the warmth of the Mediterranean sun and the crisp mountain winds.
YOU DON’T STAY INSIDE, WHY SHOULD YOUR FLOORS

Boledeck allows you to extend your interior onto the deck or any outdoor surface. 25 mm (0.98") thick thermo ash is perfect for outdoor use. Boledeck is prefinished at the factory to make installation easier and faster. The decking should be re-oiled after installation for better durability.

Please contact us for more technical details regarding decking parametrics and installation options.
UNIQUE ACCENTS TO MATCH AND COMPLEMENT YOUR INTERIOR

Our LiveEdge technology lets the natural curves of the wood shine on almost any surface and allows you to create subtle accents, like a matching table or walls – your ideas, your choices, your possibilities.
